

## 1500 Series Wilwood Internal Park Brake Kit

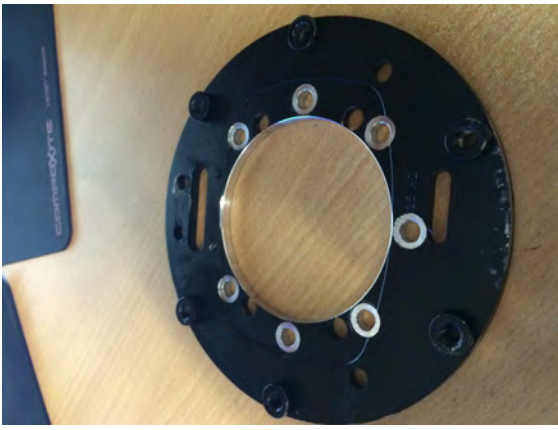

Due to requests, Race Products have now developed a way to fit the Wilwood Internal Park Brake Systems to our 1500 Series Steel Hub Floater kits.

These Wilwood brake kits have been popular as a quick easy fitment on cars with flanged axle diffs for a long time, but have not been available to suit floating hubs.

All of these kits feature an internal park brake shoe system, and offer a large range of rotor and caliper sizes, so there are options available to suit different styles and budgets.

In order to fit one of these Wilwood kits to our floating hub, we have to carry out some CNC Machining modifications to the Wilwood Components

We also supply our flanged spindles, spacer brackets, and all hardware to mount the Wilwood brakes

Various Different versions of the brake kit can be used, options include rotor size, caliper style, and colours, or polished finishes

Pictured From Left to Right:

- Superlite 4R Big Brake Kit (14.00" Rotors)
- Dynapro Dust Boot Brake Kit (12.19" Rotors)
- Dynapro Low Profile Brake Kit (11.00" Rotors)

The Wilwood Park Brake Conversion is available as a Modification Service to Customer Supplied Parts.

The kit can be used with all of our 1500 Series Steel Hub Floater Kits  
We can advise you on part numbers of a range of suitable brake kits to use for this System.

**Price:**

- 1500 Series Wilwood Park Brake Conversion  
(Supply your own Wilwood Parts)
